

Junior League of Albuquerque 2021-2022 Impact Report

OUR MISSION

The Junior League of Albuquerque is an organization of women committed to promoting voluntarism, developing the potential of women, and improving the community through the effective action and leadership of trained volunteers. Its purpose is exclusively educational and charitable.

PRESIDENT'S MESSAGE

Michelle Estrada-Lopez, 2020-2022 President

Resilience was the focus. Resilience for our members and for our organization, The Covid-19 Pandemic, brought about some wonderful changes to our organization that we will continue to moving forward. We can meet in our committees in a variety of formats including virtually. This has allowed our members greater flexibility to contribute to our mission. We have also continued to improve our business process so that we can conduct all of our business remotely.

Our Diaper Bank expansion continues, and we joined the National Diaper Bank Network and now we have access to resources and can coordinate our advocacy with other Diaper Banks across the nation. We were able to re-engage in hands on community service though volunteering with other local non-profits. We were able to host some of our favorite and most impactful events for women's leadership development this year including Ignite and Empower. Ignite focused on networking, where our members were able to connect and practice their skills while learning about non-profit advocacy. The Empower conference focused on health and wellness for women. We learned about setting boundaries and providing ourselves with a balanced life.

I want to thank each member, sponsor, donor, and supporter of the Junior League of Albuquerque. Each of you help make our organization and our community a better place for women to enter into civic leadership and create the community we all want to live in.
